

Buddy Data is a complete monitoring and alarm system for all aspects of your Dairy Farm. It can also control some items remotely. View and control from anywhere from a Smartphone, Tablet or PC, with different levels of access for staff members.

Buddy Data is a stand-alone data system based in the dairy shed. The system processes and stores your data onsite and does not require any external services (other than text and internet), meaning there are no monthly charges other than for internet and texting.

### Overview

- Effluent System – Pump, Sump, Pond and Irrigation, GPS proof of placement
- Vats – Monitors Temperatures, Fully compliant to new MPI regulations
