Irrigator
BUDDY®

Irrigator Buddy is a monitoring and alert controller for irrigators such as the Rotorainer. The Irrigator Buddy is set when the irrigator is shifted via your phone and enables monitoring once the pressure comes on. If the irrigator does not move, or stops moving during it's run before it reaches the preset distance then an alert is sent out. The status during the run can be viewed.

Control Panel Features:

- Irrigator movement monitor
- Fits to any irrigator
- Multiple irrigators can be added
- Use in conjunction with travelling Irrigator
- Monitors pressure

Optional System Extras:

- GPS proof of placement

Everybody needs a Buddy.
