# Pod BUDDY

Pod Buddy is an effluent controller that monitors the effluent to make sure it is being applied correctly through the pod irrigation system. It can be either a retrofit unit or a complete motor starter solution utilising the Effluent Buddy Controller. The Pod Buddy will shut down the pump for the following reasons:

- There is a drop or rise in pressure at the pump
- Hose broken, leaking or disconnected
- Pressure drop at the end of the line at the Pod Buddy Stand

### Control Panel Features:

- Controls up to 4 separate lines of pods via valves
- Cycles between lines activated
- Adjustable valve on time and total run time for correct application rates
- Pressure Transducer for control included
- Individual pressure set points for each line of pods
- Green Wash function
- Multiple stirrer options
- Pump protection
- Clear fault display and fault beacon
- Robust with high quality components
- Built under NZ Patent 551794/5552817

*Everybody needs a Buddy.*
